

STS at WineTech, Adelaide 2010

Australian Beverage Systems (ABS) is the local agent for the **STS Series** centrifuges from Separator Technology Solutions.

The new **STS 45** centrifuge was displayed for the first time in Australia at WineTech, Adelaide in July 2010.

Ashley Whittington (STS), Jean-Luc Favarel (Pera) & Geoff Price (ABS)
thank all who visited us at WineTech

ABS, owned by Geoff Price, is well known in Australia as the local agent for **Materiel PERA**, the French winery equipment specialist.

The **STS Series** centrifuges are used for clarification of red juice from PERA's patented **Flash Détente** and **Gulfstream** processes, as well as for traditional juice, wine & lees.

European visitors shall recognize the **STS Series** as that also supplied by PERA in Europe in their famous **blue**.

PERA has licensed the **STS Series** centrifuges for European wineries and markets under the brand **PERA STS Series**.
